

Windows Setup

Which type of installation do you want?

Upgrade: Install Windows and keep files, settings, and applications

The files, settings, and applications are moved to Windows with this option. This option is only available when a supported version of Windows is already running on the computer.

Custom: Install Windows only (advanced)

The files, settings, and applications aren't moved to Windows with this option. If you want to make changes to partitions and drives, start the computer using the installation disc. We recommend backing up your files before you continue.

Express settings

We recommend these settings, which include occasionally sending info to Microsoft. You can customize these settings now or later.

- Automatically find and connect to devices and content on this network.
- Automatically install Windows updates, app updates, and device software.
- Turn on Do Not Track in Internet Explorer.
- Help protect your PC from unsafe files, apps, and websites, and check online for solutions to problems.
- Help improve Microsoft software, services, and location services by sending us info.
- Use Bing to get search suggestions and web results in Windows Search, and let Microsoft use your location and other info to personalize your experiences.
- In Internet Explorer, use page prediction to preload pages, which sends your browsing history to Microsoft.
- Let Windows and apps use your name, account picture, and advertising ID, and request your location from the Windows Location Platform.

OneDrive is your cloud storage

Your camera roll and PC settings will automatically be backed up to the cloud, and new documents you create will be saved to OneDrive by default. That way, you can get to them from any device, even if something happens to your PC.

Turn off these OneDrive settings (not recommended)
